BE&K Building Group Completes Design-Build Project For EFACEC Power Transformers Near Savannah

The BE&K Building Group's \$64 million design-build project for EFACEC Power Transformers, Inc. in coastal Georgia reached substantial completion on August 14, 2009 — 3 days ahead of schedule! The project is sited in an industrial park in the town of Rincon, just north of Savannah.

Steve McGrey, project manager for the BE&K Building Group's regional office in Greenville, SC, noted, "This project is of extreme importance to the local and regional economy, but it also has national and international significance in that it represents Portuguese-based EFACEC Energia's first capital investment in the United States."

At the heart of the project is a 246,744-square-foot manufacturing facility where EFACEC will produce power plant electrical transformers — including core form, shell form and mobile power substations — for the U.S. market. A stand-alone, 17,558-square-foot office facility situated in front of the manufacturing facility will house headquarters, operations and support staff. The office building is distinct in that it is designed to resemble the shape of a transformer.

EFACEC has plans for a formal ribbon-cutting ceremony on December 15, 2009, with official start-up scheduled for March 2010.

About the BE&K Building Group — The BE&K Building Group, based in Charlotte, North Carolina, is a prominent construction services firm with an established track record for serving commercial, healthcare, industrial, and institutional clients throughout the Southeast, Mid-Atlantic and South Central regions. The BE&K Building Group, which has operations in eight locations, is the exclusive commercial construction arm of KBR, a leading U.S. based engineering, construction and services company.
