Building Group's \$13 Million Improvement Project at Talladega Superspeedway Tracking Ahead of Schedule

The BE&K Building Group's \$13 million improvement project at Talladega Superspeedway near Birmingham, is tracking ahead of schedule according to our project team responsible for this design-build assignment from repeat client International Speedway Corporation (ISC). The high-profile project entails renovation, expansion and new construction in Talladega's front-stretch grandstands located on the west side of the track. Our team's

scope of work, being implemented in two phases, includes demolishing and replacing existing grandstand seating areas and constructing premium box seats. Phase one construction started in late fall 2009 with completion timed for mid-April 2010. Completion of phase two is slated for October 2010. The Building Group's design-build partners for this assignment are HKS, Inc., and Walter P Moore.

In a news release, headlined "Sweet Seats — Workers Progressing on Installation of 18,000 New Seats at Talladega Superspeedway," the client applauded our team's efforts: *Feb. 2, 2010 — Workers have begun installing the first of over 18,000 new seats at Talladega Superspeedway in anticipation of the April 23-25 Aaron's Dream Weekend. Crews continue to pour concrete and lay foundations for the new seats, while other crews put the finishing touches on completed portions. It's a coordinated effort that has proved successful since the beginning of the project last November. "The construction teams have been working nonstop to complete the grandstands," said Talladega's Rick Humphrey. "Their hard work is paying off, as they are currently several weeks ahead of schedule."*

About the BE&K Building Group — The BE&K Building Group, a KBR Company, based in Charlotte, North Carolina, is a prominent construction services firm with an established track record for serving commercial, healthcare, industrial, and institutional clients throughout the Southeast, Mid-Atlantic and South Central regions.
