BE&K Building Group Awarded Design-Build Contract for General Mills Plant Expansion in New Mexico

The BE&K Building Group has been selected as the design-builder for the 180,000-square-foot expansion of an existing General Mills processing facility in Albuquerque, New Mexico. The Raleigh office of the BE&K Building Group, in a joint effort with the Atlanta office, is responsible for this latest win in the Food and Beverage sector.

The BE&K Building Group is providing design, preconstruction and construction services for this precast concrete facility addition under a design-build contract. Our scope of work also includes all utilities, exclusive of any process work. Our design-build partner is BE&K Engineering. Completion is scheduled for late September 2009.

"This project win is exciting on many fronts," said Frank Holley, business unit leader for the BE&K Building Group's Raleigh office. "Not only does it represent another successful, collaborative pursuit between the BE&K Building Group and BE&K Engineering, but it also reflects our company's commitment to geographically expanding our construction footprint."

The General Mills expansion is one of two BE&K Building Group projects currently under construction in New Mexico. Our Nashville office is providing construction services for an Emergency Room Addition at Eastern New Mexico Medical Center in Roswell for Community Health Systems.

About the BE&K Building Group — The BE&K Building Group, based in Charlotte, North Carolina, is a prominent construction services firm with an established track record for serving commercial, healthcare, industrial, and institutional clients throughout the Southeast, Mid-Atlantic and South Central regions. The BE&K Building Group, which has commercial operations in eight locations, is the exclusive construction arm of KBR, a leading U.S. based engineering, construction and services company.
